

Course Contents

First Aid Recurrent Training:

Guidelines of resuscitation ERC 2010

Heart attack – Angina Pectoris

Hypertension

Collapse, faint

Pulmonary diseases (lung oedema, embolus, asthmatic, hyperventilation, obstruction)

Economy class syndrome

Stroke

Epilepsy

Diabetes

Colic

Allergic reactions

Injuries:

Spraining, fractures, wounds, injuries of spinal col., contusion of brain, abdominal injuries

Burns, contamination of aviation fuel, shock, (bandages in practice e.g. triangular bandage)

First aid equipment in aviation (AED, disposable first aid kit)

Measure of blood pressure

General practice of resuscitation

HeartStart FR2 Defibrillator Refresher, containing:

Refresher of:

General Guidelines for the use of AEDs

Pre-flight check & Operation

Safety guidelines during operation

Procedure after use of AED

First Aid Initial Training:

New guidelines of resuscitation ERC 2010

General conditions in aeroplanes (hypoxia, TUC, decompression, oxygen, dehydration)

Heart attack – Angina Pectoris

Hypertension, collapse, faint, pulmonary diseases:

(Lung oedema, embolus, asthmatic, hyperventilation, obstruction)

Economy class syndrome, stroke, epilepsy, diabetes, colic, allergic reactions, gastro intestinal diseases, emergency child birth, infection diseases (e.g. malaria)

Injuries: Spraining, fractures, wounds, injuries of spinal col., contusion of brain, abdominal injuries, burns, contamination of aviation fuel, shock, (bandages in practice e.g. triangular bandage)

First aid equipment in aviation (AED)

Measure of blood pressure

General practice of resuscitation

HeartStart FR2 Defibrillator (AED) Initial Certification, containing:

General Guidelines for the use of AEDs

Pre-flight check

Operation

Safety guidelines during operation

Procedure after use of AED
